

Highlife® Collection NXT

NXT

Every Day Made Better™

Hot tubs used to have a reputation firmly rooted in the '70s as a place for parties. In truth, that idea went out with the leisure suit.

Our Highlife® NXT spas are designed and built to a more substantial aspiration: a spa can truly enhance your life.

Be Your Very Best

When you spend time in your spa regularly, you feel relaxed and renewed, which helps you be at your very best. Spending time in warm water can reduce stress, increase circulation, and improve sleep. Set aside time to refocus. Start each day refreshed, then use the spa to unwind in the evening. Make your personal wellness a priority each day—you'll be glad you did.

Soothing Massage

The benefits of massage have been known for centuries, and the addition of hot water enhances the experience.

While some jets provide a gentler massage, others work deep into your muscles to release tension. Relax into the comfortable sculpted seats, while jets focus on areas where daily stress tends to accumulate—the neck, shoulders, feet, and back.

Deeper Connections

Sometimes, relaxing solitude is just what you need. Other times, it's important to connect with the people close to you.

Your spa is a place where family and friends can come together. Relaxed and free from distractions, we let our guard down and open up to the people we care about most. Meaningful bonds are formed, and these connections extend well beyond the time spent together in the swirling warm water.

The Great Outdoors

Time in your spa puts you outdoors where you can breathe in fresh air, appreciate the changing morning light or count shooting stars. The experience of being outside in your spa can provide a sense of peace and perspective. Who knew that your backyard or patio could be transformed into a personal retreat?

A Revolutionary Approach

Great design inspires. It fulfills and personalizes. It reaches us in ways we could not have predicted.

Great design enhances functionality, solves problems, and simplifies. It elevates the ordinary to the realm of the extraordinary.

We understand that design can revolutionize a product. That is why when we set out to build a best-of-class spa, we partnered with BMW Group DesignworksUSA, a world-renowned design consultancy known and respected for its design innovation.

Leading the Way

As the industry leader, we are committed to providing customers with

The Absolute Best Hot Tub Ownership Experience®. We are constantly innovating, and our numerous “industry firsts” have materially improved the hot tub experience for our customers. Our Moto-Massage® DX jet, synthetic, low-maintenance siding, No-Fault® heater, dedicated circulation pump, and the ACE® salt water system have dramatically enhanced spa ownership.

Our latest innovation comes in the form of this unique collaboration with the BMW Group DesignworksUSA. With their fresh perspective and design expertise, we have redefined what a spa should look like and set an entirely new direction for the industry. We invite you to experience the completely new Highlife® Collection NXT—the next generation in spa design.

 HotSpring®

NXT

HOT SPRING® SPAS | HIGHLIFE® COLLECTION NXT | 5

Creating A Truly Superior Spa

The NXT Difference

Until now, a spa's exterior design has been relatively ordinary. The Highlife® Collection NXT spas have changed that—the visual impact of the new exterior design is surprisingly different and incredibly stunning.

Like the rest of the Highlife Collection, the NXT models feature beautifully sculpted shells and the rich, wood-grain finish of our Everwood® HD siding. NXT spas also include exclusive value-added features, like 100% no-bypass filtration and our one-of-a-kind Energy Smart® system that keeps operating costs to a minimum.

The distinct difference that separates these spas from other models in the Highlife Collection is the exterior design.

The striking NXT profile produces a unique floating effect that results in a much sleeker spa. A creatively recessed base pan and architectural corners work together to produce a contemporary look—like a piece of high-end furniture—that is unlike any other hot tub.

Polymeric Substructure

The lightweight polymeric substructure provides outstanding support and excellent fit and finish.

Polymeric Base Pan

The heavy-duty base pan features structural ribbing on the bottom that increases energy efficiency by minimizing ground contact.

NXT

Wireless Remote Control with Touchscreen Technology

This innovative spa control panel features a large LCD touchscreen. Colorful icons and intuitive menus make it easy to navigate your spa's controls. The advanced wireless technology allows you to conveniently adjust jets, lighting, and other functions from your favorite seat inside the spa, or up to 30 feet away.

Unique Floating Effect

The innovative design of the polymeric substructure and recessed base pan make the spa appear as if it is standing on its corners.

Large On/Ready Indicator Lights

A sleek acrylic plate displays the Hot Spring logo. Thoughtfully designed indicator lights reveal at a glance that the spa is on and ready for you and serve as a convenient diagnostic tool.

Architectural Molded Corners

For distinctive style, the trapezoidal shape creates a cascading effect from spa shell to base that is repeated throughout the spa's interior. An intricate textured finish adds depth and dimension.

Exterior Lighting

Exterior lights on each corner are controlled independently and can be adjusted for color and brightness. The lighting can be set to automatically turn on and off at specified times.

THE GRANDEE® NXT

Seating for 7 | 43 jets

Exclusive Features and Options

- Two Moto-Massage® DX jets
- Wireless touchscreen remote control
- 100% no-bypass filtration
- Dishwasher-safe Tri-X® filters
- Comprehensive Energy Smart® system
- BellaFontana® water feature
- ACE® salt water system (optional)
- Wireless sound system (optional)
- NXT or Everwood® HD step (optional)

The Grandee NXT *Big on features. Big on design.*

The Grandee NXT seats seven adults, providing ample space for connecting with the entire family.

The Grandee NXT features all seven types of jets we offer—for a total of 43 jets in all—including 30 directional Precision® jets, two Moto-Massage DX jets, and an assortment of other specialty massage jets. To power these jets, the Grandee NXT features two of our most powerful 2.5HP Wavemaster® jet pumps.

See detailed specifications for the Grandee NXT on page 18.

Our patented **Moto-Massage DX** jet provides two powerful streams of water that sweep up and down the length of your back. There is no other jet like it. This Hot Spring® exclusive is featured on all Highlife® Collection NXT spas.

THE ENVOY® NXT

Seating for 5 | 43 jets | Lounge

Exclusive Features and Options

- Moto-Massage® DX jet
- Captain's chair
- Wireless touchscreen remote control
- 100% no-bypass filtration
- Dishwasher-safe Tri-X® filters
- Comprehensive Energy Smart® system
- BellaFontana® water feature
- ACE® salt water system (optional)
- Wireless sound system (optional)
- NXT or Everwood® HD step (optional)

The Envoy NXT Massage you need. Design you want.

Seating five adults, the Envoy NXT is perfect for anyone who wants a large spa with powerful massage, advanced features, and innovative design.

The Envoy features a comfortable lounge seat with a Moto-Massage DX jet that sweeps up and down your back while other jets massage calf muscles and the bottoms of your feet. A uniquely sculpted captain's chair provides a full back massage and therapy for the wrists and feet.

See detailed specifications for the Envoy NXT on page 19.

The exclusive **BellaFontana** water feature produces three lighted arches of water that can be enjoyed from inside the spa or create added ambiance when spending time outside the spa. The BellaFontana is included on the Grandee® NXT and Envoy NXT models.

NXT

THE JETSETTER® NXT

Seating for 3 | 22 jets | Lounge

Exclusive Features and Options

- Moto-Massage® DX jet
- Wireless touchscreen remote control
- 100% no-bypass filtration
- Dishwasher-safe Tri-X® filters
- Comprehensive Energy Smart® system
- ACE® salt water system (optional)
- Wireless sound system (optional)
- NXT or Everwood® HD step (optional)

The Jetsetter NXT Supreme spa. Small space.

For the elegant design and sophistication of a HighLife® Collection NXT spa without a large footprint, choose the Jetsetter NXT.

The more compact Jetsetter can easily be integrated into smaller patios, yards, and decks, yet features all of the extraordinary design elements of the NXT Collection, including our exclusive wireless remote. Perfect for small families or empty nesters, the Jetsetter features a full, reversible lounge seat with our patented Moto-Massage DX jet at one end and a targeted and ultra-powerful JetStream® jet at the other.

See detailed specifications for the Jetsetter NXT on page 19 .

Luminescence® multi-zone lighting

Included on all NXT models, our unique lighting system allows you to independently control the color and brightness of each lighting zone. So you can create a custom lighting theme to suit your mood.

Maintaining Spa Water Has Never Been Easier

One of the myths about spa ownership is that keeping spa water balanced and clean can be a lot of work. Is it time consuming? Is it difficult? Do you need to be a chemist to get it right? No, no, and no.

When you choose an NXT spa from the Highlife® Collection, you not only get the best in spa design, you get The Absolute Best Hot Tub Ownership Experience® day in and day out. Our exclusive, innovative water care systems keep your spa water fresh and crystal clear with very little maintenance.

100% No-Bypass Filtration and Tri-X® Filters

In other spas, water bypasses the filters when the jets are on. Highlife Collection NXT spas include up to five filters, making it possible to run all the water through the filters, even when the jets are on—which is when filtered spa water is most important.

Our Tri-X filters use exclusive three-dimensional technology to filter more water than paper filters. They last longer and can be conveniently cleaned in your dishwasher.

The Exclusive ACE[®] Salt Water Sanitizing System

Optional on all Highlife Collection NXT spas, this revolutionary system generates cleaners automatically for a set amount of time each day.

The low-maintenance ACE system uses a patented diamond electrode to create “active oxygen” that cleans the water first. The active oxygen then combines with salt to produce chlorine and other oxidizers that keep water crystal clear.

With proper care, fewer bottled chemicals are required, and as a result, spa water can last up to 12 months*. Water sanitized with the ACE system is noticeably gentler on your skin and eyes, and smells better too.

ACE[®]
Salt Water Sanitizing System

*Visit HotSpring.com/save-water for more information.

Innovations in Energy Efficiency

Concerned about the ongoing costs of operating your spa year-round? There is no need to worry with our exclusive Energy Smart® system. These energy-saving features are included on all HighLife® Collection NXT spas:

- Multiple layers of the same high-density polyurethane foam used in commercial freezers insulate the spa shell.
- Our dense foam covers are designed to ensure a custom fit and tight seal that prevent heat from escaping. A special hinge seal locks in heat at the center of the spa cover.
- Our SilentFlo 5000® pump continually circulates water, using less energy than a 40-watt light bulb.
- Powerful WaveMaster® jet pumps are activated only when the jets are needed. Our SmartJet® system directs water only to the jets you are using, saving even more energy.
- Our patented No-Fault® heater uses a unique titanium housing and heater element that maximize heat transfer to the water, and it is warranted for five years, regardless of water chemistry.
- An innovative, patented pump shroud transfers heat from the equipment compartment to the water for added efficiency.

Delivering Real Value

Our Energy Smart system minimizes energy consumption and helps keep your operating costs extremely low. When you consider how frequently you use your spa and the important benefits you will enjoy, relative to the low monthly operating costs, you can see the tremendous value that a Hot Spring spa can provide you and your family.

Visit HotSpring.com/Energy to estimate your monthly energy costs.

Setting the Standard

All Highlife Collection NXT spas are certified to the APSP 14 National Standard and the California Energy Commission (CEC) in accordance with California law.

The Absolute Best Hot Tub Ownership Experience®

As the industry leader, we are the only hot tub brand to sell over 1 million spas—which means there are more Hot Spring spas in backyards than any other brand. We have built our reputation on quality, but you don't have to take our word for it. We invite you to read what Hot Spring owners have to say about their experience at HotSpring.com/Reviews.

Since we opened for business over 37 years ago, we have built the most extensive network of genuine, passionate, and helpful retailers in the industry. When you choose Hot Spring, you can expect leading-edge innovation in spa features and design, as well as unparalleled customer care before, during, and long after your purchase.

Hot Spring spas are made by Watkins Manufacturing Corporation, which is a part of Masco Corporation—a Fortune 500 company whose family of quality home products includes:

Contemporary Cabinet and Shell Design

The color, finish, and materials experts at BMW Group DesignworksUSA helped us carefully select a distinctive palette of cabinet, shell and cover color options.

Everwood® HD

This high-definition cabinet offers a rich wood grain finish, along with the low maintenance and durability of our original Everwood. NXT corners are molded in complementary shades to accent each cabinet color.

Mocha/LaPaz

Teak/LaPaz

Monterey Gray/Charcoal

Elegant Shell Colors

With expert insight, we selected unique colors that have broad appeal – ranging from traditional to modern tastes.

Alpine White

Crème

Ice Gray
